

Building a Graphics Package Reference

ADD 11.4 · APPLICATIONS OF DIGITAL
DESIGN

NAME

DATE

master composition • precomposing • Render Queue

1. Create a master composition.
2. Precompose and import the Suns and Moons loop, lower third, and title card as layers.
3. Order elements in time so none overlap awkwardly.
4. Add the master comp to the Render Queue; choose render/output settings, then render.

A graphics package isn't just three good pieces, it's three pieces that feel like the same designer made them: consistent color, motion style, and timing.
